|  | REGIONAL ADULT PARENTERAL DRUG MONOGRAPH  |             |        |  |
|--|---|-------------|--------|--|
| Southern Sud   | GENERIC NAME<br>benztropine   |             |        |  |
| Health   |   |             |        |  |
| Effective Date: May 2013   | CLASSIFICATION  | OTHER NAMES | PAGE   |  |
| Revised Date: Nov13-2013   | Antiparkinsonian  | Cogentin    | 1 of 1 |  |
| Review Date: Jan 10 2018   |   |             |        |  |
| ADMINISTRATION POLICY:   |   |             |        |  |
| IV Bolus –May be administered by a nurse   |   |             |        |  |
| IV Infusion – Not recommended  |   |             |        |  |
| IM Injection –May be administered by a nurse<br>RECONSTITUTION/DILUTION/ADMINISTRATION:  |   |             |        |  |
| Available as: $1 \text{ mg/mL} - 2 \text{ mL}$ vials   |   |             |        |  |
| Available as.  | 1 mg/mL – 2 mL viais  |             |        |  |
| IV Bolus:  | Administer undiluted over 2 to 3 minutes  |             |        |  |
| IV Intermittent:   | <b>ntermittent:</b> NOT PREFERRED METHOD. Dilute to 50 or 100 mL with normal saline and give over 15 to 30 minutes. |             |        |  |
| IM Injection:  | <b>M Injection:</b> Administer undiluted  |             |        |  |
| Maximum Rate:  | 2 mg/minute   |             |        |  |
| Maximum Concentration: 1mg/mL  |   |             |        |  |
| DOSAGE:  |   |             |        |  |
| Usual:   |   |             |        |  |
| <b>IV/IM:</b> 1-2 mg every 8 hours as needed (IM route preferred; same onset as IV)  |   |             |        |  |
| Maximum single dose:4 mgMaximum daily dose:8 mg  |   |             |        |  |
| STABILITY/COMPATIBILITY:   |   |             |        |  |
| Stability of Final Admixture: 24 hours at room temperature   |   |             |        |  |
| Compatibility: Compatible with normal saline   |   |             |        |  |
| PRECAUTIONS, POTENTIAL ADVERSE REACTIONS:  |   |             |        |  |
| • Anticholinergic effects: confusion, hallucinations, dry mouth, urinary retention, constipation, blurred vision, tachycardia.   |   |             |        |  |
| ADDITIONAL NOTES AND NURSING CONSIDERATIONS:   |   |             |        |  |
| • Use is contraindicated in patients with myasthenia gravis, achalasia, pyloric or duodenal or bladder neck obstructions, stenosing peptic ulcers  |   |             |        |  |
| <ul> <li>May aggravate confusion or tardive dyskinesias.</li> </ul>  |   |             |        |  |
| <ul> <li>May be administered by IM Injection – there is no clinically important difference in onset between IM or IV injection, therefore IV administration of the drug is rarely necessary</li> </ul> |   |             |        |  |
| <ul> <li>Effects of the drug are cumulative and may not be evident until 2 to 3 days after treatment has begun.</li> </ul>   |   |             |        |  |
| <ul> <li>Elderly patients: may be more sensitive to anticholinergic effects.</li> </ul>  |   |             |        |  |
