

## ACUTE CORONARY SYNDROME SUSPECTED STANDARD ORDERS CHART AUDIT

Audit 10 emergency department charts at regional centres & 5 charts at non-regional centres bi-annually.

Facility: \_\_\_\_\_ Date: \_\_\_\_\_ Audit completed by: \_\_\_\_\_

Medical Record Chart Number										
Desired response: Yes (Y) or NA	Y or NA	No	Y or NA	No	Y or NA	No	Y or NA	No	Y or NA	No
1. Initial patient history and assessment completed by the nurse										
1.1. Date and time recorded										
1.2. Allergies identified										
1.3. Chest pain assessment done										
1.4. Vital signs done										
1.5. Risk factors identified										
1.6. Medication triage completed										
2. ACS Nursing Standard Orders										
2.1. ECG done and read within 10 min.										
2.2. ASA given/topped up										
2.3. IV access established										
2.4. Supplemental O2 assessed										
2.5. Vital signs monitored as per guideline										
2.6. Cardiac monitoring established and Initial rhythm strip analyzed										
2.7. nitroglycerin given										
2.8. Lab work ordered										
2.9. Repeat ECG done										
3. Systems assessment completed										
Total number of Y or NA responses only:										

Formula:

$\frac{\text{Total \# of Yes or NA responses}}{\text{Total \# of charts audited} \times 16 \text{ total possible responses}} \times 100 = \text{\% compliance with the care map}$

Recommendations for improvement:
