STANDARD GUIDELINE SUBJECT:

Dissolve and Dose

PURPOSE:

When patients require a liquid dosage form of a medication and no commercial liquid product is available, the pharmacist must determine if the oral solid dosage form or injectable formulation of the medication may be converted to a liquid that is suitable for enteral administration.

Due to the hazards associated with the handling of hazardous and non-hazardous medications, it is ideal to minimize the potential exposure of staff during the preparation and administration of medications.

Refer to the instructions as noted below:

- CLI.6010.SG.008.SD.01 Dissolve and Dose Instructions Template
- CLI.6010.SG.008.SD.02 Finasteride Dissolve and Dose Instructions
- CLI.6010.SG.008.SD.03 Cotrimoxazole Dissolve and Dose Instructions
- CLI.6010.SG.008.SD.04 Misoprostol Dissolve and Dose Instructions
