## MAJORITY OF CARE

among highest in SH-SS

## DEFINITIONS

**Median household income:** Median combined total income after tax of all household members aged 15+ years

**Low income:** Low income is 50% of the median income in Canada adjusted for family size and composition, as a % of households and % of children (17 years and younger)

**Housing affordability:** Housing is un-affordable when spending 30+ % of total household income on shelter expenses (e.g., electricity, water, municipal services, rent, mortgage, etc.)

**Education:** % ages 15+ years with no certificate, diploma, or degree

**Socioeconomic Factor Index:** Reflects socioeconomic status and social determinants of health as a composite score of average household income, % of single parent households, unemployment rate ages 15+ years, and % ages 15+ years with no high school graduation

**Unemployment:** % ages 15+ years unemployed as a % of the labour force population

**Life expectancy:** Expected length of life in years based on patterns of mortality

**Premature mortality:** Number of deaths before the age of 75 years per 1,000 population

**Hypertension:** % ages 19+ years diagnosed with high blood pressure

**Diabetes prevalence:** Total % of residents with diagnosed (Type 1 and 2) diabetes (incidence is new diagnoses per 100 person-years).

**Arthritis:** % ages 19+ years diagnosed with arthritis (rheumatoid or osteoarthritis)

**Total respiratory morbidity:** % diagnosed with respiratory disease (asthma, chronic or acute bronchitis, emphysema, or chronic airway obstruction)

**Child asthma:** % ages 5-19 diagnosed with asthma

**Mood and anxiety disorders:** % adults diagnosed with mood or anxiety disorders

**Substance use disorders:** % 18+ years diagnosed with substance use disorders (alcohol and/or drug dependence)

**Teen pregnancies:** Rate of pregnancies (live births, stillbirths, abortions, and ectopic pregnancies) per 1,000 female residents ages 15-19

**Unintentional injury hospitalization:** Rate per 1,000 residents of those who stayed in hospital at least one day with a primary diagnosis of unintentional injury (e.g., falls, motor vehicle accident).

**Home care prevalence:** Rate per person year for active clients receiving 1 or more home care services - it is unclear whether lower/higher than MB is better/worse - it could reflect the health of a population or availability and access of services

**Majority of care:** % who received at least 50% of their ambulatory visits from the same physician or nurse practitioner - continuity is associated with improved satisfaction and better health outcomes
