

SBAR-Clinical

Name:

DOB:

PHIN (9 digit):

MB Health (6 digit):

The SBAR Clinical (verbal or written) supports communicating and highlighting a summary of pertinent information, to guide ongoing quality care for referral, consultation or mitigating risk during care transition.

Situation: *Reason for transfer/consult/referral*

Background: *Relevant medical and psychosocial history*

Assessment: *Summarize pertinent and significant findings and your assessment. What do you think the problem is? What are you worried about? What is your gut sense?*

Recommendation(s): *What do you recommend for immediate care needs? Share your insight regarding what to worry about, what could go wrong and what to look for? Confirm shared understanding with receiving provider*

Documenting SBAR-Clinical is Optional (may be used to guide standardized verbal communication)
