Define

Background/Context:

Bethesda Regional Health Centre (BRHC) & Bethesda Place (BP) are acute & long term care health facilities in Steinbach, Manitoba that employ approximately 400 health care employees. The Human Resource office, responsible for the staffing & scheduling of employees at the two facilities, has faced long term challenges with processes and operations. Only minimal & short term successes have been achieved. A Pursuing Excellence Green Belt project completed in spring 2012 achieved great success. This Pursuing Excellence Black Belt project targeted continued, larger scale improvements on the same processes.

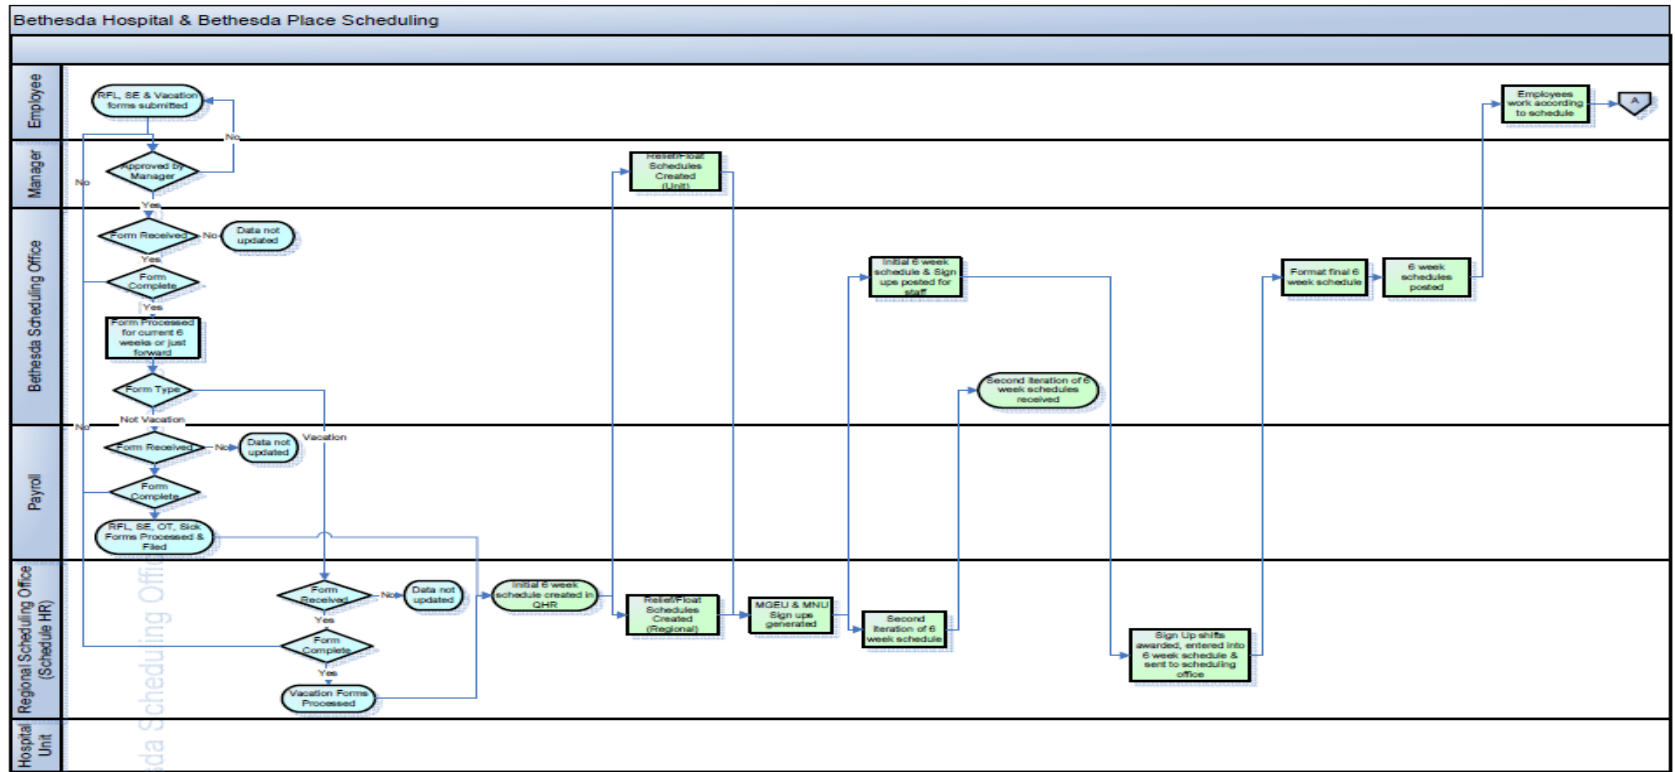

Define

Problem statement:

The process of staffing & scheduling employees is ineffective and lacks efficiency. Challenges within the system result in customer dissatisfaction r/t the impact on patient care and staff frustration r/t staffing error and payroll discrepancies.

Improve

Changes made (4 PDSA Cycles):

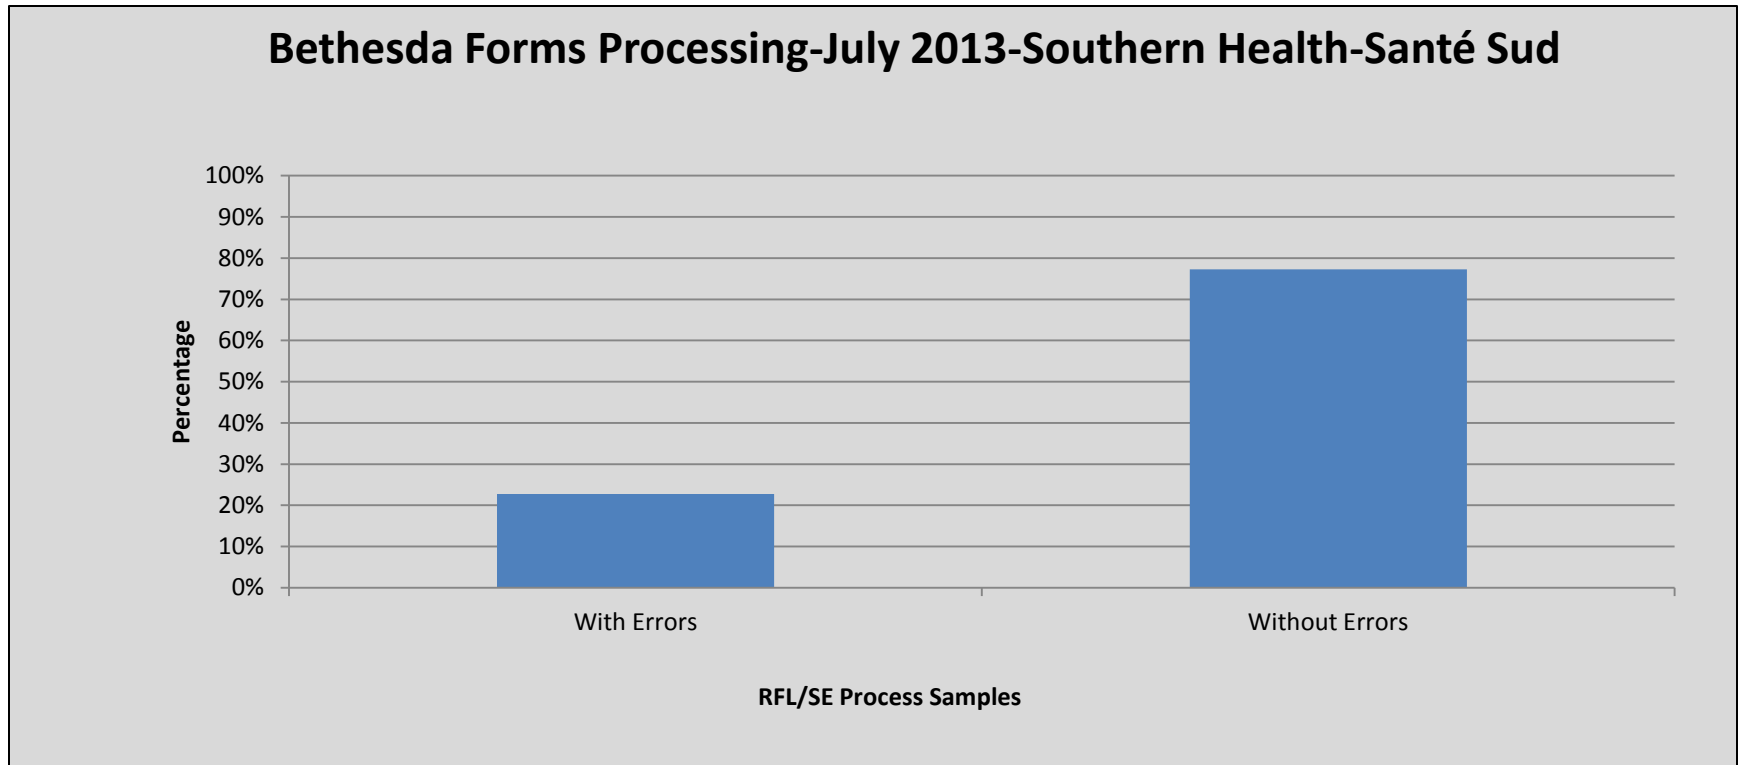

- Reorganization of the Bethesda staffer/scheduler role including work assignments, work schedules & efts.
- Trial of ESP staffing/scheduling programming software throughout Bethesda Hospital & Bethesda Place.
- Increase/improve participation of stakeholders
- Assume local responsibility for scheduling tasks (decentralized from regional office)
- Develop standard work to support changes made.

Changed Process Map – Part 2

Control

A combination of fundamental change, standard work, mistake proofing & visual controls were implemented to prevent performance lapse:

1. Electronic scheduling application changed
2. Scheduling activities moved from regional office to facility
3. Checks and balances added
4. Scheduler work assignments changed

Next Steps

Aim: To spread trialed project changes to all facilities & all staff involved in employee staffing/ scheduling operations throughout the region.

Recommended Plan:

- September, 2013 – Senior leadership team to review project outcomes & approve spread plan
- October, 2013 – Kaizen event involving all regional stakeholders
- November, 2013 – Begin implementation at regional facilities
- May, 2014 – Project spread/ implementation complete

The Team!
