

# Scabies Outbreak Admission Precaution

1. Conduct a skin assessment (just like you assess other systems)
2. Look for and ask about rash/ itch/ unusual spots, etc.
3. Start Contact Precautions for all clients who present with an undiagnosed rash suspicious of scabies
4. Continue Contact Precautions (sign on door, gowns, gloves, etc.) until Scabies is ruled out, or until 24 hours after treatment is done.

*When admission history is done, return this sheet to Ward Clerk*
