

SUICIDE PREVENTION - CHART AUDIT

Annually, complete 10 chart audits at regional centres and 5 at non-regional centres for patients who presented to the emergency department with a complaint of substance use and/or mental health and psychological issues as per Canadian Triage and Acuity Score (CTAS)

Facility: _____ Date: _____ Completed by: _____

Medical Record Chart Number																											
Desired response: Yes (Y) or Not Applicable (NA)	Y	NA	No	Y	NA	No	Y	NA	No	Y	NA	No	Y	NA	No	Y	NA	No	Y	NA	No	Y	NA	No	Y	NA	No
1. Risk of suicide identified (screening).																											
2. Suicide risk assessment completed.																											
3. Based on the level of suicide risk, immediate safety risks of suicide identified and addressed.																											
4. Level of supervision required identified and implemented.																											
5. Treatment strategies identified.																											
6. Risk of suicide was assessed at regular intervals or as needed (as defined in the plan of care).																											
7. Initial plan of care was communicated.																											
Total number of Y and NA responses only:																											
Formula: $\frac{\text{Total \# of Yes and NA responses}}{\text{Total \# of charts audited} \times 7 \text{ total possible responses}} \times 100 = \text{\% rate of meeting the indicator}$																											
Recommendations for improvement:
