Infusomat[®] SPACE Pump

Wireless Drug Library Upload Process

IMPORTANT NOTE: Please ensure that all pumps <u>and</u> SpaceStations are plugged into a power source <u>PRIOR</u> to a scheduled wireless drug library update via the wireless network.

1. A "File" symbol will flash alternately with the "Wireless Antenna" symbol when a new drug library file is available. Stop infusion when patient condition allows. **Power OFF pump to** <u>initiate</u> drug library upload process. Wait 10 seconds for the below progress bar screen to appear. Note the following:

• Pump needs to be plugged in to an AC power source (i.e. power cord or SpaceStation)

• Pumps that receive an update file while in SpaceStation **must** be powered-OFF and remain **in** SpaceStation there until update is complete.

2. Progress bar indicates that upload is in progress. <u>Allow upload to</u> <u>complete fully.</u> NOTE: Upload duration will depend on the size of the

NOTE: If you must cancel, please follow these instructions.

drug library. Large drug library files could take in excess of 30 minutes to upload completely. Do not remove pump from SpaceStation while upload is in progress.

3. Display indicates that the <u>drug library update has been successfully completed</u>. Press OK to confirm. Pump will power off. When pump is powered ON, you will see the below confirmation screen.

Caution: <u>DO NOT CANCEL</u> Upload

Canceling a Drug Library Upload

We strongly recommend that you do **NOT** cancel a drug library upload while it is in progress. Doing so will remove **ALL** drug library files from the pump and leave the pump with NO safety limits.

Canceling Process (Not Recommended)

Do not touch pump until update of Drug Library is completed
C Cancel
